GENERAL: The US Army Reserve **ALL RESERVE Championships** is a comprehensive live-fire training event that tests Soldiers ability to employ both primary and secondary weapon systems, problem solve, and think critically under the stresses created by competition. While the elements and spirit of competition are important, all Soldiers are reminded that the Army's critical intent of the competition in arms program is to develop marksmanship skills at the entry and intermediate level, recognize superior skill at the highest levels, while raising the standards of marksmanship and increasing lethality across the entire force. **Range capacity is 150 Soldiers.**

Maximum team size is 5 (4 shooters and an optional team captain/coach. Minimum size is 4 shooters.

7. COMPETITOR CLASSIFICATION:

a. Individual matches. The classification system described below applies to all individual competitions except EIC. Competitors are eligible to compete for match winner and awards authorized for their classification (Pro, Open, Novice, or Cadet). Classification is determined by prior participation in individual events at various levels of competition as described below.

1) PRO Class: Any competitor who has earned the Distinguished Badge or the President's Hundred Tab in either Rifle or Pistol, or been a member of one of the Service Teams (USAR, NGMTC Rifle or Pistol) in the last 24 months.

2) OPEN Class: A competitor who has previously fired any weapon, in any individual or team competition, at the US Army Small Arms Championships; the Interservice Championships (Service Rifle at Quantico, VA, or Service Pistol at Little Rock, AR or Fort Benning, GA); or the US National Matches. Any competitor who is not in the pro class and holds a NRA classification of Master or above, in Rifle or Pistol, must fire in the OPEN category regardless of whether or not this is their first time at the Army Matches.

NOTICE: An Open Class competitor who enters the Novice Class and fires in the Novice Class will be disqualified from awards. For example, a competitor who fired in any Rifle individual matches in a previous US Army Small Arms Championships or higher level championship (except in a junior or cadet category) is automatically classified as an Open class competitor for all events.

3) NOVICE Class: A competitor who has not previously fired any weapon, in any individual or team competition, at the US Army Small Arms Championships; Interservice Championships (Service Rifle at Quantico, VA, or Service Pistol, Little Rock, AR or Fort Benning, GA); or the US National Matches.

NOTICE: A Novice Class competitor who incorrectly enters the Open Class will not be changed to the Novice Class and will be required to continue in the class entered.

4) CADET Class: A competitor who is currently a student in a college or university US Army ROTC program.

NOTICE: Excellence in Competition (EIC) matches. EIC competition is considered open competition between all eligible competitors who fire an EIC match. Credit points and the appropriate badge (see AR 350-66 and AR 600-8-22) are awarded to the top scoring 10% of eligible non-distinguished competitors. Soldiers who enter only in EIC events in these championships are considered Open class competitors in future US Army Small Arms Championships or lower level championships. There will be an award for high rifle and pistol EIC competitors.

b. Team matches.

1) Team competition is open competition and there is no team classification. Team composition is based on a percentage of old and new shooters. At least **one** of the four shooters' on each team in all team matches must be new shooters.

2) New shooter. A Soldier who has not previously fired in the above matches (or who fired as a cadet or junior category only) at the US Army Small Arms Championships or higher level competition is considered to be a new shooter for that event.

3) Old Shooter. A Soldier who has previously fired on a team at the US Army Small Arms Championships; the Interservice Championships, (Service Rifle Quantico, VA, or Service Pistol at Little Rock, AR or Ft. Benning, GA); or the US National Matches.

4) Coach. The team coach is the administrator responsible for ensuring all paperwork is taken care of at the stat office (team declarations). During individual matches the coach may counsel with his shooter(s) until they are called to the firing line for preparation time. Coaches may again counsel with their shooter(s) after the stage of fire is complete, and in between individual stages of fire. Coaching is not permitted during live fire periods of individual matches (this rule also pertains to individual matches that result in a team aggregate, i.e. paper team events = no coaching). Coaching is allowed during team events that are not also individual events.

Competitors will sequentially number their targets as directed by the range staff.

b. **PISTOL TARGET SCORING:** Scoring in pistol matches is normally accomplished off the range under controlled conditions under the supervision of the Pistol Range Referee. Scoring will be done by the competitors or teams passing score cards left or right. Team matches may be scored on the range at the discretion of the range OIC. During all matches, when a shot touches the line between two scoring divisions of the target, the competitor will be credited with the higher value.

c. EXCESSIVE HITS:

1) If it is proven that the excess hits were made by the competitor or team firing more than the number of shots allowed, the entire score will be disallowed and the penalty can be disqualification. If there are no excess in the total number of hits, but there are more hits on one particular target than are allowed by the conditions, the score on the target with excessive hits shall be the highest score up to the number of shots permitted to be fired on that target. PART VI
RIFLE GENERAL INFORMATION

1. RIFLE RANGE SAFETY

a. **General:** The primary responsibility of the range staff is to conduct the matches in a safe manner. Everyone on the range is responsible for safety. Anyone may call a cease-fire to prevent an unsafe act. There are five general safety rules and two administrative rules which will be strictly enforced:

- 1) Assume all weapons are always loaded.
- 2) Never let the muzzle cover (or point at) anything you are not willing to destroy.
- 3) Keep your finger off the trigger until your sights are on target.
- 4) Keep weapon on safe until ready to fire.
 - a.i. Be sure of your target. Know what it is, what is in line with it, and what is behind it.
 - a.ii. There will not be any coaching allowed during individual matches.
 - a.iii. The use of cell phones in the pits by competitors is prohibited.

b. **Dry Firing:** Dry firing or sighting in with an unloaded weapon may only be done under the supervision of range staff on the firing point, provided no one is in front of the firing line. Competitors will not leave the firing line without having their weapon cleared by a block officer.

c. **Fire and Movement:** During rifle fire and movement stages, carry weapons to ensure muzzles are always pointed toward the targets. If a rifle competitor drops ammunition in a fire and movement stage during a match, it may be recovered. Dropped ammunition may not be picked up by anyone other than the competitor. Retrieve ammunition safely, keeping the weapon pointed down range.

d. **Falls on the Rifle Range:** If a competitor falls to the ground in a fire and movement stage and the muzzle of the rifle makes contact with the ground, the competitor will move forward to the firing line. He cannot continue the match until a safety officer clears his weapon.

e. **Hearing Protection:** Hearing protection is mandatory on all ranges.

f. **Weapons Security:** Weapons will not be taken from the range complex to motels, cafes, dining facilities, shopettes or the barracks. All weapons will be secured in the weapons security area upon completion of firing.

g. **Eye Protection:** Eye protection is highly recommended on the rifle range, however eye protection is required in the rifle pits. Prescription eyeglasses or standard issue safety shooting glasses will suffice. Safety glasses are not available for issue.

h. **Sight Adjustments:** Rifle sights may be adjusted at any time utilizing proper safety procedures, i.e. keeping the weapon down range at all times, under the supervision of a block officer.

i. **Safety blocks/Safety flags:** Safety blocks/Safety flags are mandatory and are to remain in the weapon at all times until directed otherwise by the Range Control Tower.

2. US MILITARY FORCES SERVICE RIFLE REQUIREMENTS:

a. Service Rifle: The service rifle is the Army Standard-A 5.56mm M-16A2/3, M-16A4, and M4/M4A1 Carbine as issued and type classified by the US Army. Parts MAY NOT be interchanged between different rifle types. Commercial equivalent and heavy barrels are not allowed in any match. The rifle will be serviceable in accordance with Army Regulations and technical manuals. Sights may be blackened, but no appliances may be affixed to shade or alter the standard sight. Non-issue parts will not be used (including fore-end grips). Issue parts will not be cut, filed, honed, sanded, or altered in any way except as authorized by this program or the appropriate regulations and technical manuals. You may not replace M16A2/A4 or M4 trigger components with those from an M16A1 or M4A1. Optic sighting systems and the M-68 reflex sight are not allowed. Only issue iron sights are allowed.

NOTE: Use of the M16A1 rifle is not authorized due to non-availability of A1 ammo. The M-4 Carbine is authorized for use during the matches.

b. Rifle Sling: Any tactical sling may be used as an aid to steadiness. It may be used as a single point sling attached to the front sling swivel or as a 2-point sling attached to both sling swivels. The use of a sling is not mandatory, however if used it must be attached to at least the forward sling swivel and not wrapped around the hand guards. The sling must not be attached to the rifle in such a manner as to restrict the competitor from safely carrying out weapon handling drills.

c. Trigger Testing and Weapon Inspection: All rifles must have their triggers weighed and tested prior to the first round of competition to ensure they meet service weight standards and requirements. All weapons will be inspected prior to the first round of competition to ensure they meet the intent of the program and technical manuals. Any weapon failing the test must be repaired. Teams are responsible for providing repair parts to service their team's weapons. If the weapon is not repairable, the competitor may either forfeit the right to fire the match or may obtain another weapon, which shall also be tested. MINIMUM trigger weight for the M-16/M4 is outlined in Technical Manual 9-1005-249-23+P and TM 9-1005-319-23+P. Weapons may be inspected at any time throughout the course of the competition at the direction of the Range OIC, All Army OIC, or Match Director. Weapons will arrive in a serviceable condition.

A.1) M16A2, M16A4 & M4 5.5 to 9.5 lbs

A.2) M16A3, M4A1 5.5 to 8.5 lbs

d. Magazines: Only issued 30 and 20 round magazines may be used. Commercial equivalent magazines are not authorized. Magazines may only be loaded by hand, or with an issued speed-loader (bandolier provided).

3. RIFLE RANGE COMMANDS AND POSITIONS

a. RIFLE RANGE COMMANDS

1) The rifle is at "**LOCK AND LOAD**" when: "The BOLT IS FORWARD on an EMPTY CHAMBER, magazine inserted, and selector lever on safe. The position of LOCK and LOAD will be used during ALL matches. AT NO TIME will a competitor have the bolt forward with a round in the chamber while moving. The competitor may only chamber a round once in position. Non compliance will be grounds for immediate disqualification from the match."

b. RIFLE FIRING POSITIONS DEFINED: In the All Army Small Arms Championships, with the exception of wearing the equipment specified in the match program, the positions used will be as defined below.

1) **The Ground:** All references to “the ground” in the following position rules are to be construed as applying to the surface on the firing point, floor, or shooting mats, and platforms that are customarily used on shooting ranges.

2) **Artificial Support:** Any supporting surface except the ground not specifically authorized for use in the rules for the position described. Digging of elbow or heel holes at the firing points which form artificial support for the elbows, arms, or legs is prohibited. Use of artificial support (such as back braces) is prohibited.

3) **Prone Position:** Body extended on the ground, head toward the target. The rifle will be supported by both hands and one shoulder only. No portion of the arms below the elbows shall rest upon the ground or any artificial support, nor may any portion of the rifle or body rest against any artificial support. The magazine or magazines may be rested on the ground only.

4) **Standing Position:** Erect on both feet, no other portion of the body touching the ground or any supporting surface. The rifle will be supported by both hands and one shoulder and upper arm only. The elbow or upper arm of the forward arm may be placed against the body or rested on the hip. The use of a sling for support is prohibited in the standing position.

5) **Kneeling Position:** The elbows may rest on the shooters knees for support. The rifle will be supported by both hands and one shoulder. The rifle or magazine or magazines may be rested on the knee for support. The buttocks must be clear of the ground, but may rest on one foot.

6) **Squatting Position:** The butt of the rifle must rest against the shoulder or armpit, with the weight of the body supported on both feet and the knees bent. No other part of the body will touch the ground or any other supporting object.

7) **Standing Alert Position/Low Ready:** Standing erect on both feet, no portion of the body touching the ground or any supporting surface. The butt of the weapon placed in the shoulder, supported by both hands, and with the muzzle pointing at the ground at an angle of approximately 45 degrees.

4. RIFLE SCORING: When scores are not maintained in the pits, individuals are responsible for verifying the score entered on their scorecard before turning in the card and leaving the range. Scorecards will not be issued on the range to replace lost scorecards. Competitors who lose their scorecards must go to the STAT office and receive replacement scorecards. The target used for the US Army Small Arms Championships will be the M9 Modified Pistol Target. The target and the dimensions are described below.

b. M9 Modified Pistol Target Dimensions:

X-Ring:	4”x2”
5-Ring:	6”x4”
4-Ring:	12”x8”
3-Ring:	18”x12”
2-Ring (Aiming Black):	34”x19.5”

a. Rifle Slow Fire Matches:

- 1) Competitors are required to score and mark targets unless otherwise directed by the Range Officer.
- 2) Upon completion of the match, scorecards will be verified and signed by the competitor and scorer. It is the competitor's responsibility to ensure his scorecard has been correctly completed and the correct numbers of hits and their value have been documented. The statistical officer will re-compute the total value on the scorecard. The competitor or team is responsible for turning in the score card to range personnel.
- 3) Any objection to the scores entered on an individual or team score card must be made immediately on the firing point. Subsequent challenges will not be accepted.
 - 4) If no shot is marked or scored after a shot has been fired, the competitor or the scorer may request range personnel to have the target pulled and marked.
 - 5) Scorer must have a scope or binoculars.

b. Rifle Timed Fire Matches:

- A.1) Competitors are required to score and mark targets unless otherwise directed by the Range Officer.
- 2) In snap shooting, rapid fire, fire with movement stages, and any other stage in which each shot is separately marked, the method of scoring will be:
 - A.1.a. Each sighting shot, where allowed, will be marked by a spotting disc as for a slow fire shot.
 - A.1.b. When a stage of the match has been completed, if there are no challenges, the range officer will signal to the pits to score the targets.
 - A.1.c. Scores will be taken and the total number of hits and their value will be shown on the scoreboards.
 - A.1.d. Spotting discs will be placed in all shot holes and targets raised for competitors to verify. Scores will be recorded on scorecards on the firing line by the scorekeeper.

c. Target Marking and Scoring:

- 1) During slow fire matches and for rapid/snap match sighting shots, each shot will be marked separately. The actual shot hole will be indicated by a spotting disc and the shot value will be indicated by a scoring disc (in the case of a miss the value will be indicated using two scoring disks in the illustrated locations).
- 2) During slow fire, a fluorescent orange disk will mark value and location.

3) During slow fire matches, the competitor will fire his next shot immediately after the previous shots have been marked. There will be no delay to paste an old shot; the old sighting shot will be pasted when the new shot is marked.

4) During scoring, the scorer will tell the shooter which shot he fired and the value of the shot. i.e., "Your first sighting shot is an X." The scorer can tell the competitor the location of the shot but cannot tell him how to correct his shot, i.e., "Your sixth shot is a X at 6."

5) When a shot touches the line between two scoring divisions of the target, the competitor will be credited with the higher value.

d. Excessive Hits:

1) When in any match or series of matches, the total number of hits on a competitor's target or targets exceeds the number of shots he fired, and when there is no means of identifying these shots, all hits will be scored and the procedure will then be as follows:

2) If it can be proven the excessive hits were made by the individual firing more than the number of shots allowed, the score will be disallowed, and will result in no score for that stage.

2) In the case of a crossfire, when it has been proven that the competitor fired no more than the allowed number of shots (10), then that competitor will receive the value of the highest (10) hits on his target. There will be no re-fires allowed due to excessive hits. The target will be scored in the pits and shown to the competitor IAW normal match procedure.

5. CHALLENGES IN RIFLE MATCHES:

a. Slow Fire Matches: During slow fire matches, the signaled value of a hit may be challenged only before any subsequent shot has been fired at the same target. The following procedures will be used to determine the results of the challenge.

1) If the challenge is for a hit, the hit or a miss will be signaled.

2) If the challenge is for a higher value, the correct value will be signaled.

3) During slow fire matches, a ricochet will be signaled as a miss. No spotting disc will be shown. A shot will not be declared a ricochet unless it gives evidence (by the throwing of sand or dirt against the target in the pits) that it has previously struck the ground. An elongated hole is not, by itself, evidence of a ricochet.

b. Timed Fire: During timed exposures, the following will occur:

1) If the challenge is for the number of hits in a match other than slow fire matches, the competitor will be advised of the pit officer's decision before the match continues.

2) If the challenge is for the non-exposure or short exposure of a target during a match, and this is confirmed by a block officer, pit officer or scorer on the firing line, there will be an additional exposure of the target for that competitor only for the time stipulated for the match. The additional exposure must be identified before the next stage begins.

3) If the challenge is for a higher value, the correct value will be signaled.

c. The call for challenges by a Range Officer in other than slow fire matches, when the targets are displayed upon completion of the match, will be the last opportunity for a challenge.

6. TIMING OF EXPOSURES IN RIFLE MATCHES: Method: A stopwatch will be used for timing exposures or the duration of firing. The official time for all timed exposures will be kept in the pit.

a. Timed exposures: In timed exposures, raising, lowering and the facing of targets is to be done as quickly as possible. In all types of matches, the exposure will be timed from the moment the last target is exposed and stationary. No verbal indication as to how the time is passing is allowed.

b. During stages that require reflexive fire, timings will be controlled on the firing line by the Chief Range Officer.

7. TIE-BREAKING PROCEDURES:

a. Individual Matches: The following steps will break ties in individual matches in order.

a.i. Single Stage.

- a) By the greatest number of "X"s.
- b) By inverse order of shots, counting singly from the last shot to the first shot.

a.ii. Multiple Stages at different distances.

- a) By the greatest number of "X"s.
- b) By the score obtained at the longest distance, the next longest distance, etc.
- c) Multiple Stages at different distances, but the score at each distance and/or stage cannot be determined. (Scored as single target)
- d) By the greatest number of "X"s.
- e) By the greatest number of hits of highest value, next highest value, etc.
- f) Multiple Stages at different distances, but the score at each distance and/or stage cannot be determined. (Scored as multiple sets of targets)
- g) By the greatest number of "X"s.
- h) By the scores of "targets sets" in reverse order.

a.iii. Individual unbreakable ties will be determined by the following:

a.iii.1. Rifle Match 321.

a.iii.2. Pistol Match 221.

a.iii.3. If a tie still exists a shoot off will be directed as determined by the Match Director.

b. Team Matches: Team match scores will be ranked by applying the preceding Rule 1 of this section to the total team score for each range and stage, as applicable. If rule 1 cannot be applied, precede as follows:

- 1) Single stage, scored as single target.
- 2) By the greatest number of "X"s.
- 3) By the greatest number of "5"s, by the greatest number of "4"s, etc.

4) Multiple stages:

- a) By the total aggregate score of the last stage.
- b) By the total aggregate score of the next to the last stage, etc.
- c) By the highest individual aggregate score, second highest individual aggregate score, etc.
